

THE EAGLE

Location Device

For hard to track assets

Ideal for **equipment, containers, skips, trailers, pumps, generators** and other non-powered assets that are exposed to the elements.

Compact & Low-Profile

Easy mounting in the corrugation on containers or concealed on the underside of a trailer. Housing screws together for easy assembly, with 2 convenient mounting tabs. It also has 'strap slots' allowing the Eagle to be cable tied or metal strapped to an asset.

IP67 Weather-Resistant, Rugged Housing

The IP67 rated housing is made of sturdy ABS/ Polycarbonate plastic to survive bumps and knocks and to survive many years in the sun, rain and weather.

Super-Long Battery Life

Track up to 5 years (once daily) using 3 standard size A-cell alkaline batteries or two years with regular updates.

The Eagle is a Compact Low-Cost Battery-Powered Tracker on Sigfox Network.

Designed for tracking containers, trailers, skip bins, and other assets where super-long battery life is required without sacrificing the frequency of updates and performance.

The IP-67 rated housing is rugged and UV stable, so the Eagle can be mounted on assets that are exposed to rain, dust and marine conditions.

By utilising the latest technology, the Eagle can operate in ultra-low power modes. With an incredible battery life of up to 5 years the Eagle can be attached to assets and tracked without needing to change batteries.

The Eagle has built-in antennas for GPS reception and for Sigfox communication, a 3D accelerometer, a high-performance GPS that can track both GPS and GLONASS satellites simultaneously and flash memory for storing non-volatile information. The option of using extended temperature range AA batteries allows the Eagle to be used in extreme climates that other tracking devices simply cannot operate in.

The Eagle uses the Sigfox network to give you coverage of your assets at a low data cost. The Sigfox network coverage is excellent however it does not cover all areas of Australia. The adjacent coverage map is to be used as a guide. As additional coverage is being added all the time, visit <https://www.sigfox.com/en/coverage> for an up to date coverage map.

Features:

- IP67 Rugged weather-proof housing
- Fully powered by 3 AA consumer batteries
- Up to 5 years tracking on Sigfox low-cost network (once daily)
- Small, Compact and easy to install and conceal
- Configure by USB cable

The Eagle:

- \$150 + GST

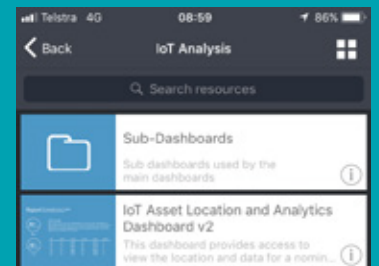

Monitoring Packages:

Standard

- \$5 + GST per month (location ping once per day)

Premium

- \$8 + GST per month (location ping once per day plus movement alerts at 10 minute intervals)
